

COVER-POOLS® LETS YOU FOCUS ON FUN

If you already have a pool, or if you're planning to build one, remember: a pool without a pool cover is like a house without a roof. A Cover-Pools automatic pool cover is the best way to safeguard loved ones, save money on heating costs and chemicals and protect your investment.

Find out for yourself what delighted pool owners all over the world have already discovered—our automatic pool cover is the finest, safest, and easiest-to-use pool cover you can buy. So, kick back, relax, and enjoy all the benefits of pool ownership. Cover-Pools has you covered.

Protect your pool and your loved ones.

Do not walk or stand on cover except in an emergency.

WITH A POOL COVER, YOU GET PEACE OF MIND

With a Cover-Pools cover you get peace of mind with the simple turn of a key. In under a minute your pool is easily covered or uncovered. Your Cover-Pools cover acts as a “horizontal fence” for your pool, preventing access by children, pets, and uninvited visitors. And while there’s no substitute for proper supervision, your pool can be protected even when you’re not around. It’s a safety barrier that no pool should be without.

Maximum Safety

Cover-Pools pool covers are independently certified to exceed the requirements of the American Society for Testing and Materials (ASTM F1346-91), which sets safety standards for pool covers.

Cover-Pools pool covers are UL listed for electrical and ASTM safety standards.

Follow all safety and warning disclaimers found in the owners manual.

A POOL COVER SAVES UP TO 70% ON OPERATING COSTS

A Cover-Pools cover extends your swimming season by reducing heat loss.

The U.S. Department of Energy has stated that a cover is the single best way to reduce heat loss on a pool. A covered pool also helps prevent the evaporation of both water and expensive chemicals. It even acts as a passive solar heater by capturing the sun's radiant heat and extends your swimming season.

At the same time, it keeps dirt and debris out of the pool, reducing cleaning, maintenance costs, and wear on pool equipment. Cover-Pools covers have proven to be a great way of reducing pool expenses throughout the year.

For indoor pools, a cover provides the added benefit of eliminating the need for expensive dehumidification systems.

Spend time swimming, not cleaning.

The Cover-Pools automatic cover. One cover, four seasons.

Your Cover-Pools cover is all it takes for year-round pool protection.

Saves energy, adds heat.

A Cover-Pools cover dramatically reduces heating costs and extends your swimming season by acting as a giant solar collector.

Saves water and chemicals.

By reducing evaporation, your Cover-Pools cover cuts water loss and reduces the use of chemicals.

Saves cleaning.

Keep dirt, leaves, and debris out by simply keeping your pool covered.

Saves pool equipment, extends pool life.

With a covered pool, you keep the heat in and the dirt and debris out. Heaters and other pool equipment work less and last longer.

Saves money.

By saving heat, chemicals, cleaning, and extending equipment life, your Cover-Pools cover quickly pays for itself. You can save up to 70% on operating costs, which is a great return on your investment.

ANY POOL, ANY SHAPE— COVER-POOLS® HAS YOU COVERED

Vanishing-edge pool

At Cover-Pools, we love a good challenge. So go ahead, bring us your freeform pools, your kidney shapes, spas, L shapes, and anything else you can dream up. If you can build it, we can figure out a way to cover it.

Every pool makes its own unique statement, and Cover-Pools believes design should never be an obstacle to the benefits of a strong and dependable pool cover.

Deck-on-deck pool

Pool with raised wall and water features

L-shaped pool with two covers

We can cover your pool no matter what the shape.

A CUSTOM POOL DESERVES A CUSTOM-DESIGNED SYSTEM

Extreme-cantilever pool with rock features and waterfall

"Our company installs automatic pool covers throughout Arizona. We depend on both the high product quality and business integrity that Cover-Pools® is known for. Cover-Pools stands behind its products and by their word. Arizona Pool Covers would not install or recommend covers manufactured by any other company."

Alan and Coni Stiles
Arizona Pool Covers

Vanishing-edge pool

Deck-on-deck pool

Perimeter Overflow

We've been designing custom covers since 1962 and can accommodate almost any pool shape or design feature. As trends develop in pool design, Cover-Pools constantly develops new and more creative ways to cover any pool. From waterfalls and rockwork to vanishing edges and other water features, no challenge is too great.

Our staff of experts work with architects, engineers, and builders, providing them with knowledgeable input to help cover the pool of your dreams.

LET OUR TRACKS GUIDE YOU

Undermount Track Systems

Underside™ track system

Underside track is a perfect way to fully integrate the cover into the pool and deck. With an Underside track installation, the tracks are concealed beneath the deck. It's the ultimate in smooth, worry-free operation.

Underside track and track channel

For freeform pools with Underside track, the channel makes it easy to construct deck-on-deck applications around any vinyl, fiberglass, or concrete pool.

Corr-Resist™ Non-Metallic Track Channel

Our non-corrosive track channel is built to withstand the harshest pool environments eliminating costly deck repair due to channel failure. The channel is composed of rigid material that is perfect for salt water pools.

Underside design allows a variety of deck profiles.

(Low-profile)

Deck-on-deck with track channel (standard)

Corr-Resist™ Non-Metallic Track Channel

V-PAK™ KIT

Cover Kit for Vinyl-Liner Pools

The V-Pak is a complete, easy-to-install cover kit for vinyl-liner pools.

- Cover unit and fabric
- **Flush-mount Lid** that aesthetically covers the recessed housing to create a flat surface
- Coping for three sides
- Two Coping Options - Vinyl-liner coping and Track Channel with vinyl retainer
- **Stainless-steel** lid bracket
- New UPB deluxe box
- New Beam Cover with vinyl retainer provides protection for the cover fabric
- Square, 45°, 6" or 24" radius corners
- Available in white or gray
- Four standard pool sizes—
14 x 28, 16 x 32, 18 x 36, 20 x 40

Complete V-Pak Kit

Track channel with vinyl retainer

Deck Mount Track Systems

Universal track system

Universal track can cover existing pools of virtually any shape or construction. Just give us enough deck room to run the low-profile tracks parallel to one another on opposite sides of the pool and we can put a cover on almost anything.

Standard Universal track

SnapTop™ track system

SnapTop track is a two-piece track system that conceals the screws from view and creates a smooth, streamlined track surface.

SnapTop track

Universal tracks mount securely to the pool deck and can be painted to coordinate with the deck.

Flush track system

Flush track is a deck-mounted track that is installed flush with the deck. The new channel comes with a reduced width, provides debris protection, allows for smoother cover operation and less fabric-wear, and a built-in rope diverter. The snap-in-place stand provides easy height adjustments during installation.

Flush track

Slim™ track system (manual covers only)

Slim track is similar to the SnapTop™ track. It provides all the same advantages, but uses a smaller profile. Typically the track is used with Step-Saver® manual pool covers.

Slim track

NEW! Adjustable Glider and Dowel

The adjustable glider and dowel combination provides the ability to incrementally adjust the leading edge height to 3" above and 3" below the track. You can obtain exactly the correct position to accommodate for design obstacles, such as hiding a leading edge or clearing an inset spa. The new dowel comes standard with most undertrack systems.

NEW! Square Leading Edge

Cover-Pools square leading edge creates a modern finish to your pool cover while adding rigidity. The square shape reduces deflection, which makes it easier to hide the leading edge and creates a better seal at the far end pool wall. The square leading edge comes painted in Cover-Pools 240 gray to match the track channel and flush lid. To create a more integrated look, the leading edge can be wrapped in fabric identical to your pool cover. The wrapped leading edge comes separate from the cover fabric to reduce slack and wrinkles seen in other wrapped leading edges.

LIDS AND BENCHES

Deck-mounted mechanism

When the mechanism is mounted on the deck surface, it can be covered simply with fiberglass ends or the Everlast™ bench. The bench kit offers a convenient, durable, and low-maintenance way to cover your mechanism.

You can also create your own bench design with our bench frames and materials supplied locally by your dealer or an independent contractor.

All polymer panels on the Everlast bench come in four different colors to coordinate with your deck. Please see actual polymer samples when making color choice. Colors may vary.

Everlast bench

white

beige

Fiberglass ends

gray

terra cotta

Recessed mechanism

The mechanism can be discretely housed in a box below the deck surface. This option works best if chosen before construction. However, if there is room to cut into the deck of an existing pool, the mechanism can still be recessed. Cover-Pools offers many lid options for covering the mechanism.

Typical position of leading edge when cover is fully retracted.

Extended Vanishing Lid™ allows the leading edge of the retracted cover to be hidden.

Easy Roller™

The Easy Roller System reduces cover friction and residual water pooling on top of the fabric making for smoother cover operation. By reducing the friction between the cover and the beam edge, the Easy Roller allows for less wear on the fabric, while maintaining cover performance.

Aluminum lid

Our standard lid for both Universal track and Underside™ track systems offers an economical way to conceal and protect the mechanism.

Flush-mount lid

Our flush-mount lid is a walk-on lid that completely covers a recessed pool cover mechanism while remaining even with the surface of the deck.

Flat Bezel™ lid

Designed for Underside track systems, the flat Bezel lid gives step-on strength with a more streamlined appearance and beveled edges.

Tilted Bezel lid / Stepped Bezel lid

The tilted (shown) or stepped Bezel lid for Universal track systems features step-on strength with a narrow tilt or low-profile rise to accommodate the track. It also has beveled edges.

Vanishing Lid™

The Vanishing Lid provides the most integrated look for concealing the mechanism. Your coordinating deck material hides the mechanism housing and blends into the rest of the deck.

Extended Vanishing Lid

The extended Vanishing Lid system is designed to allow the cover to retract completely under the lid. This requires the lid system to be 18" to 24" wide.

All aluminum lids can be powder coated to coordinate with your deck. Choose from a selection of standard colors or special-order colors. Please see Powder-Coated Extrusion samples when making color choice. Colors may vary.

ELECTRIC OR HYDRAULIC, PICK YOUR POWER

Motor

- **Exclusive** 3/4 hp waterproof submersible motor
- Twice the available torque of other electric or hydraulic motors on the pool cover market
- O-ring sealed with potted wire entry points
- Hardened-steel gears encased in permanent grease
- UL listed

Slip Clutch

- Acts as torque-limiting safety device to protect cover and mechanism
- **Exclusive** design with industrial marine-grade brake material
- Designed to last a lifetime
- Electric system comes with your choice of a slip clutch or auto-shutoff

Corr-Resist™ Rope Reel System

- **Exclusive** EZ-Lock rope reel system for simple cover alignment
- **Exclusive** hybrid rope reel with stainless-steel side plates, designed for quiet operation
- Utilized Corr-Resist technology to prevent corrosion

The driving force

Meet the brawn behind the beauty. The driving force behind every cover system is our state-of-the-art mechanism, proof that nothing but the best goes into every one of our covers. The high-grade stainless-steel and anodized-aluminum mechanism is specifically suited to the pool environment and contributes to smooth operation and overall longevity of the system.

Cover-Pools electric system

Our standard electric drive system has an advanced 3/4 hp, high-torque, waterproof motor made exclusively for Cover-Pools. Each electric system comes with your choice of a slip clutch or auto-shutoff feature. The slip clutch is designed for adjustable power and releases torque from the motor if the cover meets an obstacle. The auto-shutoff uses advanced circuitry with a backup amp limiter to act as an electronic slip clutch if the cover movement is obstructed.

CoverLink™ digital control

The code-accessed digital control system allows you to program up to four codes to create convenient and secure access to the system. With the wireless version, you have endless options for mounting the touch pad within view of the pool.

Key switch

Turn the key to cover or uncover the pool. To maintain a secure system, simply remove the key after you've covered the pool.

Auto-Shutoff with Amp Limiter

- Shuts motor off when cover is fully opened or closed
- Amp limiter acts like an electronic slip clutch
- LED diagnostic indicators
- Works with accessory board to control water features
- Electric system comes with your choice of a slip clutch or auto-shutoff

Mechanism

- **Exclusive** components designed to work with today's mineral sanitizers
- Marine-grade anodized aluminum frame and brackets
- All stainless-steel hardware
- All aluminum components, castings, and extrusions are anodized to prevent corrosion

Positive Shift System

- **Exclusive** positive-shift system
- 3/8" solid stainless-steel drive dowel
- Provides complete gear engagement with each use
- Hard-cast stainless-steel gears for strength

Corr-Resist™ Hybrid End Casting

- **Exclusive** hybrid end casting with stainless steel and durable polymer parts, to prevent corrosion
- **Exclusive** marine-grade anodized roller drum

Cover-Pools hydraulic system

For special site conditions or for those who prefer hydraulics, the Cover-Pools powerful hydraulic system provides more compact components and increased space efficiency. Its sensitive pressure-release system allows for adjustable power and a built-in automatic shutoff. Lower operating pressure provides maximum safety.

OUR QUAD-CORE™ FABRIC IS ENGINEERED FOR DURABILITY

Quality in a variety of colors

Cover-Pools exclusive Quad-Core fabric is the product of 50 years of research and experience. Reinforced with a strong polyester mesh for strength and tear resistance, this high-performance vinyl-resin formula provides maximum durability in the swimming pool environment.

Choose from standard colors shown above. More colors are available in special-order vinyl. Please see actual fabric sample when making color choice; colors may vary.

- Material: PVC vinyl, laminated over a reinforced polyester mesh for strength and tear resistance
- Color Match Webbing: Sewn or welded, matching colors available
- Rigorously Tested: The exclusive formula is the product of over 50 years of testing and experience
- Designed for the Pool Environment: UV, mildew, and pool-chemical resistant with superior dimensional stability
- Weight: 18 oz. per square yard
- Thickness: 19 to 23 mil laminated vinyl
- Strength: Exceeds the ASTM F1346-91 minimum standard of 485 lbs. per 3' radius
- Construction: Fabric is attached to webbing and low-stretch standard rope, ultimate rope or no-stretch stainless steel cable with double-sewn bonded polyester thread for durability

The Intelligent Pool Cover

With the iAquaLink, pool owners can easily control pool features with a smart phone. When the cover is closed, AquaLink® will deactivate any water features, limit chlorine output, and reduce pump run time saving up to 50% on energy and chemicals.

By including a Cover-Pools Interface Board with their purchase of a Jandy Pro Series AquaLink control system, pool owners gain the following functionality:

- The One Touch™ controller and iAquaLink show whether the pool cover is open, closed, or partially open.
- The salt chlorine production levels automatically adjust when the cover is opened or closed.
- Water features, booster pump cleaners and pool lights will automatically shut off when the cover is closed.
- The filter pump run time will automatically decrease when the cover is closed.

This increased functionality will **automatically**:

- Save energy and operating costs.
- Lengthen the life of the salt cell.
- Avoid over chlorination of the pool.
- Save water, protect the cover, and give pool owners extra peace of mind.

iAquaLink™

Pump Run Time: 10 Hours
Chlorinator: 80%
Spa Overflow: On
Water Features: On
Booster Pump Cleaner: On
Lights: On

Pump Run Time: 5 Hours
Chlorinator: 20%
Spa Overflow: Off
Water Features: Off
Booster Pump Cleaner: Off
Lights: Off

Apple® is not a participant or sponsor of this promotion.

Automation

Operating the automatic cover is as easy as turning a key or pressing a button. For safety, the cover stops as soon as the control is released. Press the button and the cover glides across the pool in under a minute. You can even coordinate water features, lights and other accessories to work with your automatic system.

Auto-shutoff control with optional accessory board

The auto-shutoff control stops the cover automatically when it is fully opened or closed. The accessory board controls operation of water features, fiber optics, alarms, etc., in conjunction with opening and closing the cover.

Automatic water pump

Cover-Pools systems use an automatic pump (as required by ASTM safety standards) to conveniently remove standing water that may accumulate on top of the cover as a result of rain, sprinklers or cleaning. The pump automatically turns itself on when water is present and shuts off once the water has been removed.

Autosave™ spa cover

The Autosave spa and swim spa cover offers the same safety and energy-saving benefits as a full-size automatic pool cover with a more compact mechanical system. Designed for space-restricted installations, the Autosave safety cover can be used on new and existing spas, swim spas, and small pools.

- The compact motor and mechanism reduce the space required for an automatic cover system
- Can be used for in-ground and above-ground spas, swim spas, and small pools
- Convenient access and security at the touch of a button
- Fits within standard 12" coping for a truly rectangular raised spa
- Smaller width Everlast™ bench available

Step-Saver® manual reel cover

The Step-Saver is an economical alternative to the automatic cover, offering the same benefits at about half the price. It's a manual cover that's convenient enough for daily use since there are no bothersome straps, no sandbags, and no anchors.

To cover the pool, hold the rope attached to the leading edge and pull the cover across the pool. To uncover the pool, turn the crank handle. Most manual covers require two-person operation, but in some instances, one person can operate the Step-Saver system.

Original turn handle

Our standard turn-handle system makes removal of the pool cover on a standard-sized pool a less strenuous task than "anchor" type covers.

Power Wheel™ (optional)

The Power Wheel option facilitates cover removal by letting you use both leg and arm muscles to uncover the pool. This option also allows operation from inside a recessed housing.

Upgrade to an automatic system

The Step-Saver system uses the same track, fabric and other components as the automatic system, except without a motor. This means that you can easily upgrade to an automatic system by adding a Save-T automatic power package later if desired.

STAINLESS STEEL CABLE

It won't break. It won't stretch.

THE LATEST IN POOL COVER TECHNOLOGY

The new automatic pool covers with stainless steel cables are designed to virtually eliminate the need for realignment associated with the frequent opening and closing of automatic covers. The high-strength steel cables offer superior durability especially when compared to the standard rope cables typically used on an automatic pool cover, which are more likely to stretch or break. Stainless steel cables translate to a long-lasting cover that provides better performance and require less maintenance.

No Breaking*

This high-strength stainless steel cable offers superior durability in a pool environment.

No Stretching*

Stainless steel cable eliminates stretching associated with the frequent opening and closing of automatic covers.

No Adjustments*

By eliminating stretching and shrinkage, stainless steel cables eliminate the need for realignment. No more service calls for rope adjustments.

Long Lasting

The new automatic pool covers with stainless steel cables will keep your pool cover running without the hassle of stretching, shrinking, or breaking rope.

When installed and maintained in accordance with instructions and owner's manual

DESIGNED TO PERFORM IN ALL POOLS – SALT WATER POOLS INCLUDED

Corr-Resist™

Cover-Pools® recognizes that a swimming pool environment can often be harsh on a pool's components. Chlorine and other chemical usage, and more recently the popularity of salt water pools have combined to challenge manufacturers to re-engineer their products. Accordingly, Cover-Pools has introduced its Corr-Resist line of products. We anodize our roller drum. We provide hybrid end hubs and rope reels which use both stainless steel and polymers to reduce corrosion. This level of protection is accomplished without any of the problems associated with introducing zinc anodes into the pool.

Mechanism Brackets

- All stainless-steel drive components
- Marine-grade anodized aluminum components

Corr-Resist End Hub

- End hub with stainless-steel and durable polymer parts prevent corrosion
- High-density polymer tube mounts break the corrosive path between dissimilar metals

Corr-Resist Track Channel

- Durable, non-metallic track channel composed of rigid polymer material with UV absorbers
- Eliminates all salt corrosion protecting one of the most fundamental parts of the cover system

Marine-Grade Anodized Aluminum Tube

- Anodized tube creates an armored shield against corrosion
- **Coated tube end upgrade-** additional polyurethane coating that encases the tube ends with a protective shield

Rope Reel System

- Noryl® copolymer center hub isolates and breaks the corrosive path
- High-grade stainless-steel rope reel plates resist corrosive conditions

WHAT MAKES COVER-POOLS THE WORLD'S FINEST POOL COVER COMPANY?

The most experienced automatic pool cover company in the world

When our founder, Joe Lamb, invented and patented the automatic pool cover, he also launched a new industry. Since 1962, Cover-Pools has created over 125,000 safer pools around the world.

The most options for customization

Every pool is special. That's why we make your cover system to your custom specifications. Cover-Pools offers a wealth of options to blend your cover system into your outdoor living area. This means that you choose the right combination of safety, convenience, value, and beauty.

The most experienced and extensive network of dealers

With knowledgeable dealers in fifty states and over fifty countries, Cover-Pools covers the world. Cover-Pools holds annual APSP-accredited seminars for intensive dealer training and also provides in-field dealer support.

The most time-proven warranties in the industry

At Cover-Pools, we believe that the best warranties are backed by the most reliable companies. We have fifty years of experience to support our warranties. You can stand on our reputation.®

The most responsive customer-service team in the industry

Our customers constantly tell us that it's the people of Cover-Pools that make their experience so wonderful. When you call Cover-Pools, you reach a live person to provide you with knowledgeable solutions. Every employee at Cover-Pools contributes to customer service—from the production staff to the president, you know you're in capable hands.

The most innovative engineering team

To our design team, it's the little things that make Cover-Pools systems so reliable. Always on the leading edge of innovation, our engineers use the latest technology to ensure you receive The World's Finest Pool Cover.

All illustrations and specifications contained in this brochure are based on the latest product information available at the time of printing. Cover-Pools reserves the right to make changes at any time without notice, in colors, materials, equipment, specifications, and models.

Cover-Pools systems and parts are available through independent dealers/distributors worldwide. No dealer/distributor is an employee, agent, or representative of Cover-Pools Incorporated.
