

**ZODIAC**<sup>®</sup>

*a better life*

**COVER**  **POOLS**<sup>®</sup>

## PROTECT YOUR LOVED ONES

With a Cover-Pools® cover you get peace of mind at the simple turn of a key. In under a minute your pool is easily covered or uncovered. Your Cover-Pools cover acts as a “horizontal fence” for your pool, preventing access by children, pets, and uninvited visitors. And while there’s no substitute for proper supervision, your pool can be protected even when you’re not around. It’s a safety barrier that no pool, new or existing, should be without.

### Helps save lives

Cover-Pools pool covers are UL listed for electrical and ASTM safety standards.

Cover-Pools pool covers are independently certified to exceed the requirements of the American Society for Testing and Materials (ASTM F1346-91), which sets safety standards for pool covers.

### WARNING

- REMOVE STANDING WATER—CHILDREN CAN DROWN ON TOP OF THE COVER
- REMOVE THE COVER(S) COMPLETELY BEFORE ENTRY OF BATHERS—ENTRAPMENT IS POSSIBLE.
- NON-SECURED OR IMPROPERLY SECURED COVERS ARE A HAZARD.
- DO NOT WALK ON THE COVER EXCEPT IN AN EMERGENCY.
- FAILURE TO FOLLOW ALL INSTRUCTIONS MAY RESULT IN INJURY OR DROWNING.

## SAVES YOUR POCKETBOOK

The U.S. Department of Energy has stated that a cover is the single best way to reduce heat loss on a pool. A covered pool helps prevent the evaporation of water and expensive chemicals. In addition, it is the single best way to reduce heat lost and even acts as a passive solar heater by capturing the sun's radiant heat, extending your swimming season.

### Saves energy

Acting as a giant solar collector, the cover dramatically reduces heating costs and extends your swimming season.

### Saves water and chemicals

By reducing evaporation, your cover cuts water loss and reduces the use of chemicals.

### Saves cleaning

Keep dirt, leaves, and debris out by simply keeping your pool covered.

### Saves pool equipment

With a covered pool, you keep the heat in and the dirt and debris out. Heaters, salt generators, and other pool equipment work less and last longer.

### Saves money

By saving heat, chemicals, cleaning, and extending equipment life you can save up to 70% on operating costs.

## PICK YOUR SYSTEM

### Electric motor

### Electric system

Our exclusive electric drive system has an advanced 3/4 hp, high-torque, waterproof motor. It comes with your choice of a slip clutch or auto-shutoff feature to release torque from the motor if the cover meets an obstacle. The auto-shutoff uses advanced circuitry with a backup amp limiter to act as an electronic slip clutch if obstructed.

### Autosave™ Spa Cover

### Spa cover

The Autosave spa and swim spa cover offers the same safety and energy-saving benefits as a full-size automatic pool cover with a more compact mechanical system. Designed for space-restricted installations, the Autosave safety cover can be used on new and existing spas, swim spas, and small pools.

### Step-Saver® Manual Pool Cover

### Manual reel cover

The Step-Saver is an economical alternative to the automatic cover, offering the same benefits at about half the price. It's a manual cover that's convenient enough for daily use since there are no bothersome straps, no sandbags, and no anchors.

## NO PROBLEM. WE CAN STILL COVER YOUR EXISTING POOL!

### DECK TRACKS: Four Different Options

Deck mounted track systems are available for installation on existing pools and offer the same safety, convenience, and savings as other tracks. These types of tracks are low profile in appearance and can be powder coated to blend in with your surrounding deck.

#### Universal track system

With enough deck space to run the low-profile tracks parallel to one another, **Universal track** can cover existing pools of virtually any shape or construction.

Standard Universal track

#### Slim™ track system (manual covers only)

**Slim track** is similar to the SnapTop track. It provides all the same advantages, but uses a smaller profile. This track is used with Step-Saver® manual pool covers.

Slim track

#### SnapTop™ track system

**SnapTop track** is a two-piece track system that conceals the screws from view and creates a smooth, streamlined track surface.

SnapTop track

#### Flush track system

**Flush track** is a deck-mounted track that is installed flush with the deck. The new channel comes with a reduced width, provides debris protection, allows for smoother cover operation and less fabric-wear, and a built-in rope diverter. The snap-in-place stand provides easy height adjustments during installation.

Flush track

## ENGINEERED FOR DURABILITY

### QUAD-CORE™ Fabric

For additional information, call 1-800-447-2838 or visit our photo gallery and website at [www.coverpools.com](http://www.coverpools.com)

dusky blue   royal blue   light blue   aqua   forest green

beige   tan   brown   gray   slate gray   black

### Quality in a variety of colors

Cover-Pools<sup>®</sup> exclusive Quad-Core fabric is the product of 50 years of research and experience. Reinforced with a strong polyester mesh for strength and tear resistance, this high-performance vinyl-resin formula provides maximum durability in the swimming pool environment.

- **Material:** PVC vinyl, laminated over a reinforced polyester mesh for strength and tear resistance
- **Rigorously Tested:** The exclusive formula is the product of 50 years of testing and experience
- **Designed for the Pool Environment:** UV, mildew, and pool-chemical resistant for stability
- **Weight:** 18 oz. per square yard
- **Thickness:** 21 to 23 mil laminated vinyl
- **Strength:** Exceeds the ASTM F1346-91 minimum standard of 485 lbs. per 3' radius
- **Construction:** Fabric is attached to webbing and low-stretch standard rope, ultimate rope, or no-stretch stainless steel cable with double-sewn bonded polyester thread for durability

## OPTIONS AND ACCESSORIES

### Everlast™ Bench

### Deck-mounted mechanism

The bench kit offers a convenient, durable, and low-maintenance way to cover your deck-mounted mechanism.

All polymer panels on the Everlast bench come in four different colors to coordinate with your deck; White, Beige, Gray, Terra Cotta. Please see actual polymer samples when making color choice. Colors may vary.

### Auto-shutoff control

The auto-shutoff control stops the cover when it is fully opened or closed. You can also purchase an optional accessory board that controls operation of water features, fiber optics, alarms, etc., along with the cover.

### Corr-Resist™ Technology

Cover-Pools® recognizes that a swimming pool environment, which, often includes chlorine and salt, can be harsh on a pool's components. In response, Cover-Pools has engineered its Corr-Resist line of products, including anodized roller drums, and rope reels and end hubs which use both stainless steel and polymers to reduce corrosion.

### The Jandy® Pro Series Aqualink™ Connection

Using new software and control board for the Aqualink, water features can automatically be turned off when the cover is closed. The Aqualink will also allow pool owners who use salt systems to automatically reduce chlorine production when the cover is closed. Reducing pump time saves up to 50% on energy & chemicals.

### CoverLink™ digital control

The code-accessed digital control system allows you to program up to four codes to create convenient and secure access to the system. With the wireless version, you have endless options for mounting the touch pad within view of the pool.

### Key switch

Turn the key to cover or uncover the pool. To maintain a secure system, simply remove the key after you've covered the pool.

## NEW! STAINLESS STEEL CABLE

It won't break. It won't stretch.

When installed properly, the new automatic pool covers with stainless steel cables are designed to virtually eliminate the need for realignment associated with the frequent opening and closing of automatic covers. The high-strength steel cables offer superior durability especially when compared to the standard rope cables typically used on an automatic pool cover, which are more likely to stretch or break. Stainless steel cables translate to a long-lasting cover that provides better performance and require less maintenance.
