

COVER  POOLS®

# Safety Has Never Been This Much Fun

# For Existing Pools

Make the beautiful pool in your backyard retreat even better. Maximize your investment and ensure your swimming pool will remain the source of fun and enjoyment for your family and friends for years to come.

## Benefits

A Cover-Pools automatic pool cover is all you need for year-round pool protection. This multipurpose cover acts as a safety cover, a solar cover, and a winter cover, all combined into one efficient system. Discover all the benefits that satisfied pool owners around the world already enjoy.

**Protect Your Loved Ones:** Help safeguard your loved ones while protecting your investment.

**Save Money & Conserve Energy:** Save up to 70% on operating costs and chemicals for your pool.

**Maximize Your Time:** Spend more time enjoying your pool and less time maintaining it.

**Water Conservation:** Prevent 90–95% of water evaporation.

## Pick Your System

### Save-T<sup>®</sup>3 Automatic Pool Cover

Ready to build your new pool? This is the perfect time to talk to your pool builder about adding one of the best safety features for your beautifully designed pool, a Cover-Pools automatic pool cover system. Our standard electric drive system has an advanced .75 horsepower, high-torque, waterproof motor made exclusively for Cover-Pools.

### AutoSave™ Spa Cover

The AutoSave Spa and swim spa cover offers the same benefits as our full-size covers, but with a more compact mechanical system. Designed with space restrictions in mind, the AutoSave Spa Cover can be used on new and existing spas, swim spas, and small pools.

### Step-Saver® Manual Pool Cover

The Step-Saver is an economical alternative to an automatic cover, offering the same life-saving and money-saving benefits at half the price. It is a manual pool cover that moves through low-profile tracks to cover and uncover the pool. There are no bothersome straps, sandbags, or anchors required to hold it in place.

### BigRed™ Electric Motor

BigRed, our standard electric drive system, is the toughest waterproof motor on the market today. It is the elegant workhorse of the pool cover industry, using an advanced .75 horsepower, high-torque, waterproof motor.

## Track Options

With Cover-Pools' unique component track accessories, virtually any pool can be covered. To cover an existing swimming pool with a pool cover system, consider these questions:

- Can the track system be installed at the widest part of the pool with the tracks running parallel to each other?
- Is there room at one end of the pool to accommodate the pool cover mechanism?

### Universal and SnapTop™ Universal Tracks

Pools of any shape or construction can be covered using Universal Track. You simply need enough deck room for low-profile tracks to run parallel on opposite sides of the pool.

### Slim Track™

The Slim Track is a deck-mounted track designed for spas, swim spas, and small pools with Step-Saver manual pool cover systems. The installation takes up less deck space and has a smaller profile than SnapTop Track.

### Flush Track

Cover-Pools Flush Track is a deck mounted track that is installed flush with the deck. The new channel comes with a reduced width, provides debris protection, and allows for smoother cover operation.

### Track Options

If you are remodeling your pool and deck, you may be able to take advantage of installing Underside Track during construction. Underside Track is concealed beneath the pool's overhanging edge (coping) for a more streamlined look.

## Replacement Cover Fabric

Whether you have a Cover-Pools cover or a competitor's brand, your local Cover-Pools dealer can assist you with incorporating Cover-Pools QuadCore™ fabric as a custom replacement cover for your system.

Through repeated testing, we've developed our QuadCore fabric formula that provides maximum durability in any swimming pool environment. Reinforced with a strong polyester mesh, this high quality vinyl resin formula resists weather, mildew, and chemical extraction.

\*Textured swatches show the underside construction of the fabric

## Options and Accessories

### EverLast™ Bench Kit

When the mechanism is mounted on the deck surface, it can be covered simply with an attractive housing such as the Cover-Pools EverLast Bench. This kit offers a convenient, durable, and low-maintenance way to cover your mechanism.

### Fiberglass Ends

When the mechanism is mounted on the deck surface, it can be covered simply with our fiberglass ends. Fiberglass ends offer an economical way to cover the motor and mechanism.

### Stainless Steel Cables

Our exclusive stainless steel cables are designed to eliminate the need for realignment associated with the frequent opening and closing of automatic covers. They provide superior durability, better performance, and require less maintenance than standard rope cables.

### Auto-Shutoff

The auto-shutoff turns off the cover automatically when it has reached the open or closed position. Also available for purchase is an optional accessory board that controls operation of water features, fiber optics, and alarms along with the cover.

### Key Switch

The key switch control comes standard with automatic cover systems. Simply turn the key to cover or uncover the pool.

### CoverLink™ Digital Control

The CoverLink Digital Control allows you to program four access codes for your pool or spa cover. Both wired and wireless versions are available.

### AquaLink™ Interface Board

When the cover is closed, AquaLink will automatically deactivate water features, lights, and booster pump cleaner. AquaLink can also reduce chlorine output and pump run time, saving up to 50% on energy and chemicals. In addition, you can view the status of the pool cover.

### Original Turn Handle for Step-Saver

Our standard turn handle system makes removal of the pool cover on a standard-sized pool a less strenuous task than anchor type covers.

### Power Wheel™ for Step-Saver

The Power Wheel option facilitates manual control of the cover and allows operation from inside a recessed housing.
