REDUCTION

Conserve water, save energy and reduce chemical usage
– all while adding a layer of safety to your pool
with an automatic cover from Cover-Pools

Think Cover-Pools®. Think Safety.

Cover-Pools® is the world's leading manufacturer of automatic pool covers. We invented the automatic pool cover and patented it in 1962. Since then, we've been protecting families and their pools with the most innovative pool cover systems available.

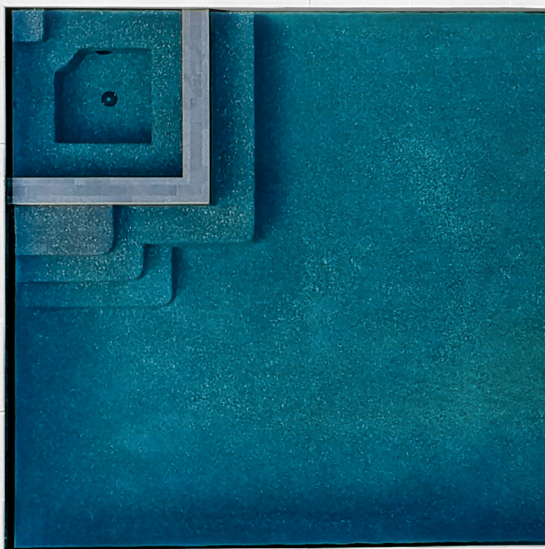

Focus On The Fun: 100% Peace of Mind for Pool Access

A pool cover acts as a horizontal fence for the pool, safely reducing the risk of unwanted or unsupervised access by children and pets.

SUSTAINABILITY

A more sustainable swimming pool begins with a pool cover. Automatic pool covers prevent water loss, retain heat, and allow you to save on expensive chemicals.

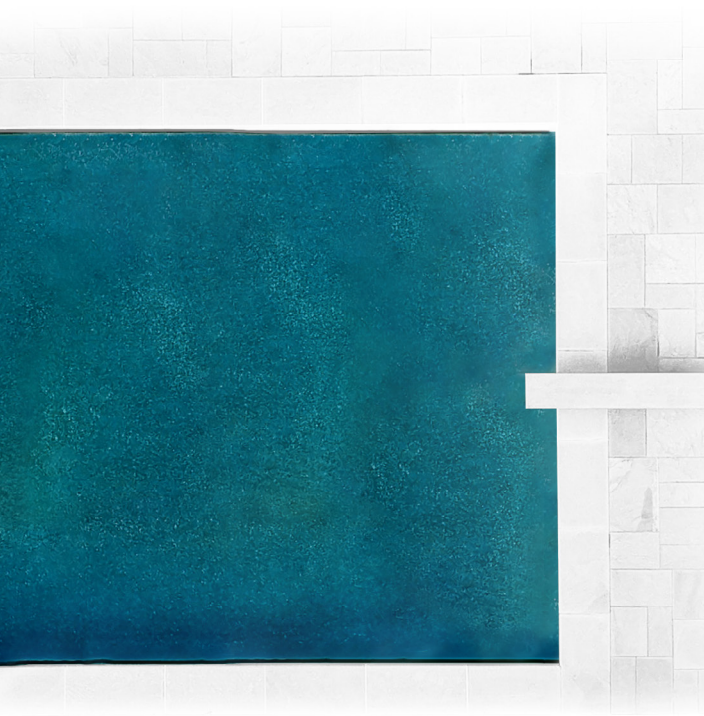

A standard sized pool with an automatic cover can save 24,440 gallons¹ of water.

¹Calculation based on a 20' x 40' pool with a surface area of 800 ft² evaporating at 1" per week.

"A pool cover is the single most effective means of reducing pool heating costs."

U.S. Department of Energy

WATER CONSERVATION

Finally A Solution That Holds Water: Eliminate Evaporation by 94%²

An automatic pool cover makes the pool drought-resistant by preserving water, a precious resource. With this new addition, you can cut water loss due to evaporation by as much as 94% and in effect, save money in the long run.

ENERGY EFFICIENCY

Save Energy For Better Things: Reduce Operating Costs by up to 70%³

A pool cover collects heat from the sun and retains heat from pool heaters, keeping your pool warm and saving an average of \$2,000 per year.

CHEMICAL REDUCTION

Stop Pouring Money Down The Drain: Cut Chemicals by 60%³

By preventing evaporation and keeping debris out, a pool cover significantly reduces a pool's chemical needs, such as chlorine, by up to 60%, so not only do chemicals last longer, but you will not need to use them as frequently.
